OVERVIEW :-

❑ **S.O.S.** (which stands for Save Our Souls) used as international Morse code for distress signal.

❑ In a **S.O.S**. system , a distress signal is generated when the S.O.S. button is pressed, or a gesture is made

❑ The distress signal consist of a text message consisting of the sender's location. This message is sent to the cops and close relatives whose contacts are saved by the user as guardians.

❑ It will reduce the response time for any emergencies and the victim can be saved easily.

❑ This app is a multipurpose utility to send messages to friends not only in danger but also can be used for chatting.
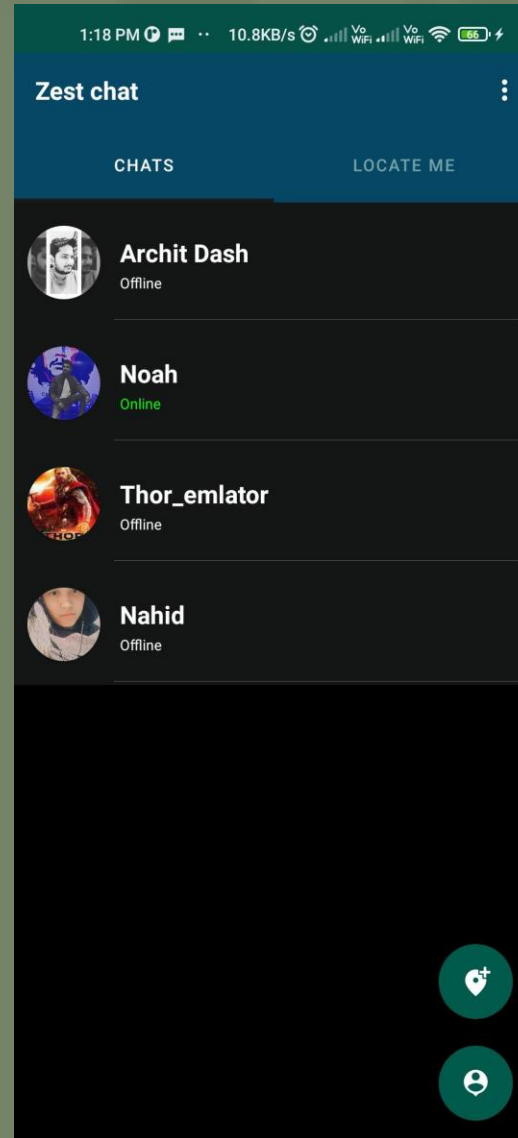

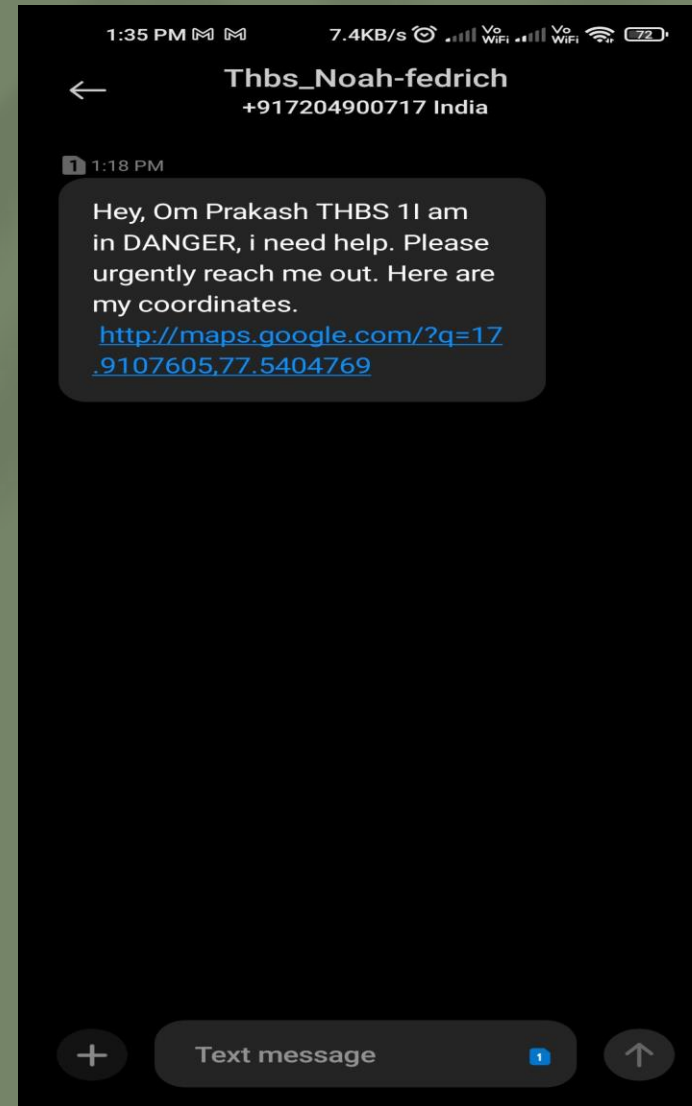

Technologies Used :-
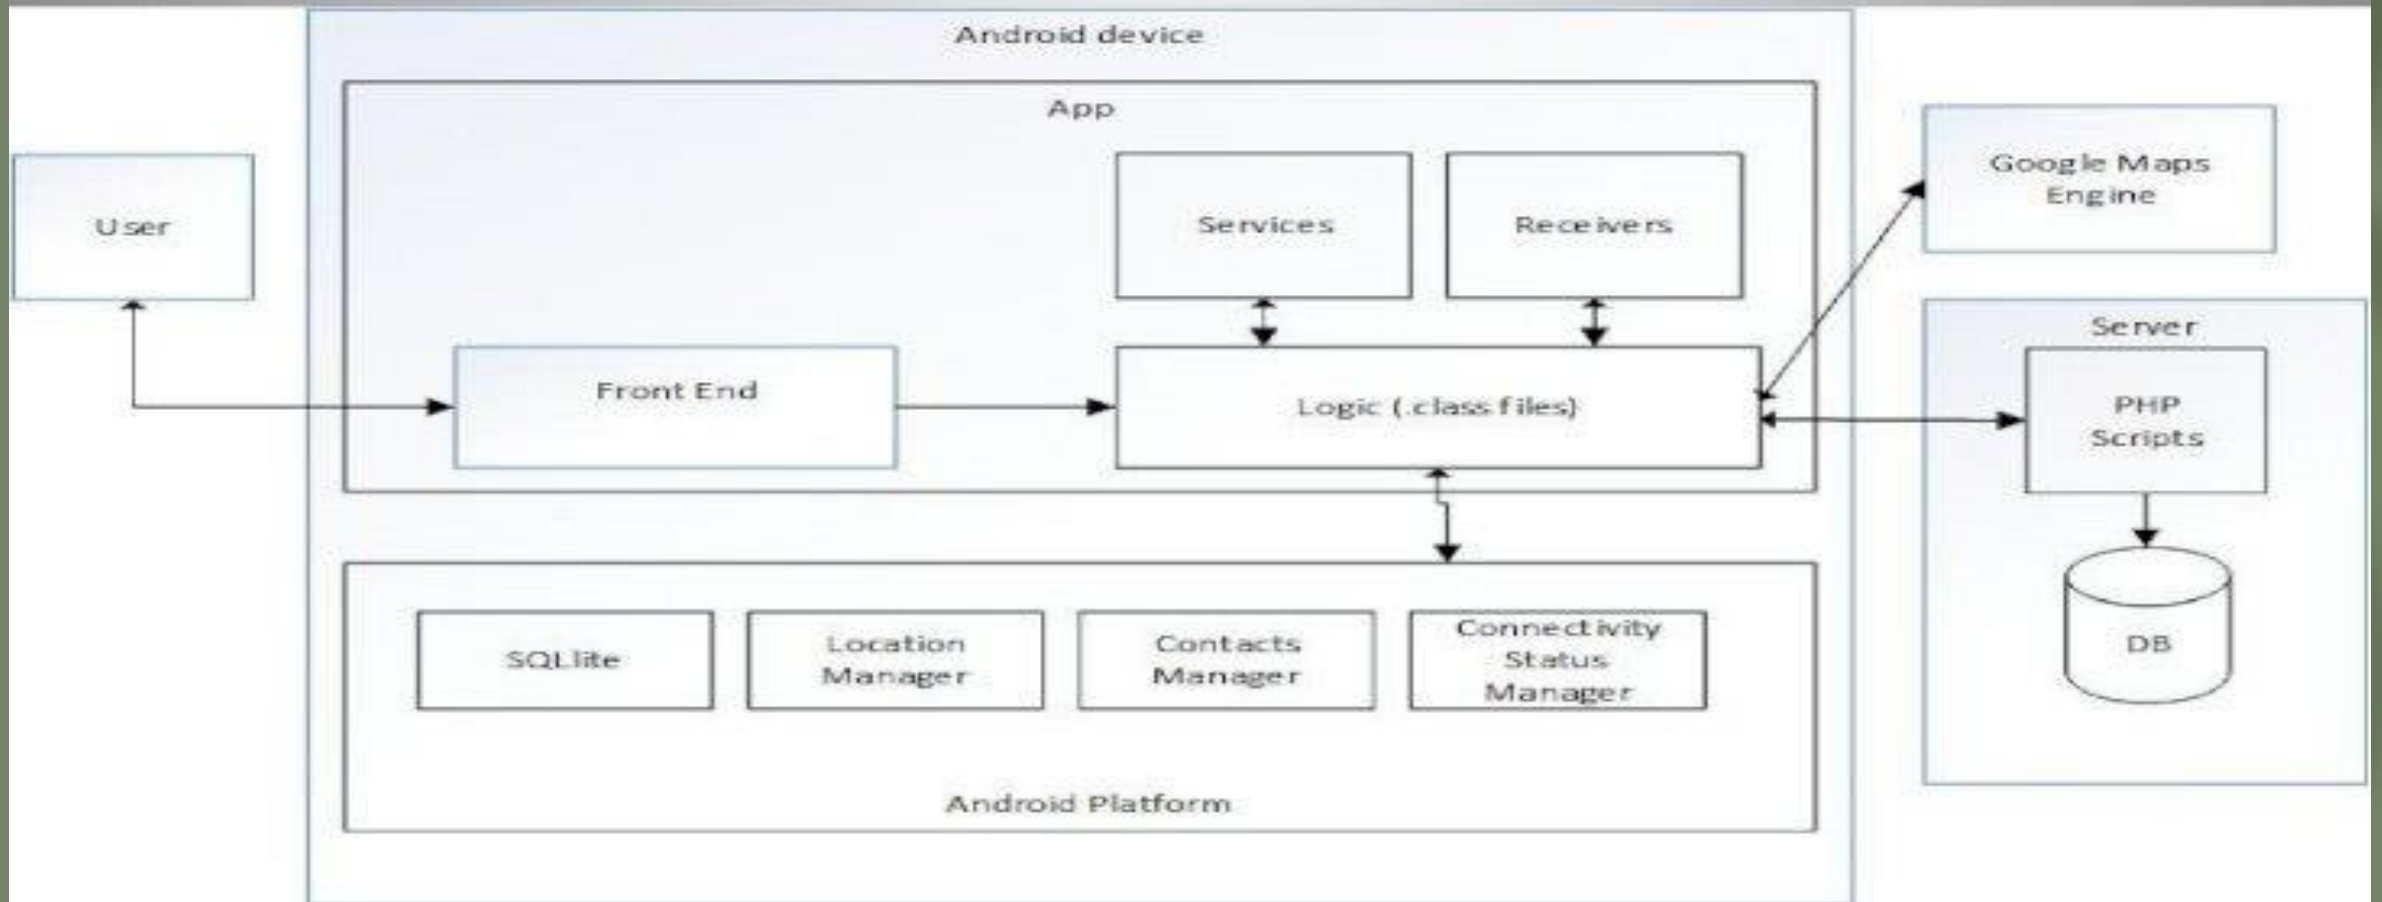

Android Studio
Firebase
Java

User Interface Page :-

Users Chat Page :-

Architecture

FUTURE SCOPE

❑ A home screen widget that can be used as a triggering point in panic situation.

❑ Setting up a password to stop the application.

❑ Live Tracking.

❑ Voice recognition S.O.S. activation.

Thank you
